

CAA-EEH ERGONOMIC ENTERTAINMENT HANDSET

The CAA-EEH is an ergonomically designed, easy to grip handset with soft touch, back-lit silicone buttons for patient control of TV/music, lights, and nurse call functions on an Austco nurse/staff call system.

Incorporates a microphone and speaker for use with Austco's two-way speech (audio) nurse call systems and for non-intrusive TV or radio/music sound (pillow speaker). Includes an earphone socket for external headphone use.

The nurse call functions feature a CALL button available in green, red or orange and a red call reassurance light. Other control buttons are easy to identify - Light on/off (yellow) and TV/music on/off, Volume up/down and Channel up/down (all blue).

All buttons are manufactured from silicone rubber with anti-bacterium additive as an infection control measure.

The CAA-EEH is supplied together with a handset hook suitable for mounting on a bedside or bed-head panel. Mounting of the handset hook on a Clipsal™ 2000 series plate is an order option.

CAA-EEH ERGONOMIC ENTERTAINMENT HANDSET

Features	Benefits
Unique shaped ergonomic design with textured, coloured and back-lit buttons.	Fits comfortably into a patient's hand with easy thumb or finger access to the control buttons. Avoids confusion and assists the sight impaired especially at night or in low light situations. Suitable for left or right handed use.
Single "all-in-one" patient handset.	Simple single point of control by patient of TV/music, lights and nurse call functions.
Soft touch recessed silicone buttons with anti-bacterium additive.	Easy to activate the controls, including by the infirm or patients with manipulative disabilities. Recessed buttons prevent accidental operation.
Incorporates microphone and speaker as well as socket for external earphone.	Provides private intercom point for nurse-to-patient two-way speech communications. Can be used as non-intrusive pillow speaker, or with patient's own earphones, for TV/music sound including volume controls.
Strong cable with strain relief.	Secure cable connection with resistance to twisting and tension.
Handset removal alarm.	Sounds a buzzer and activates a call if handset is removed from its socket.
Water and impact resistant case.	Easy to clean with most standard hospital cleaning disinfectants. Protected against fluid damage and damage due to dropping.
New infrared TV controls.	Easy to install TV control without wiring into the TV.
