

CM-Dx OVER DOOR LIGHT SERIES

The CM-Dx series of Over Door Lights are for use to indicate active alarms/calls and their priority levels where required on an Austco nurse/staff call system. Typically installed in corridors outside rooms in hospitals, nursing homes and retirement villages to indicate the room from which a call was made.

The CM-Dx series comes with multiple LED colour options and these combined with steady or flashing input operation can indicate all typical priority levels of active alarms/calls on a system, in accordance with most user specified or regulatory standard colours and operation, allowing speedy and efficient response to calls including - Staff Presence, Staff Assist or Emergency calls.

A CM-DX fits into a standard single gang Australian or North American wall box.

CM-Dx OVER DOOR LIGHT SERIES

Features	Benefits
User friendly operation.	Highly visible coloured lamps for easy call recognition.
Colour configurable.	Available with one, two or three different colour options in red, yellow and green.
High reliability solid state LED light source.	No "bulb" failures, maintenance time or replacement costs required.
Modern unobtrusive design.	Aesthetically pleasing with concealed fixings manufactured of unbreakable plastic.
Compatible with all Austco room controllers.	Site upgrades are simple and inexpensive as all equipment is compatible and reusable.
Mounts in single gang wall box with no sub-assemblies.	Uses standard inexpensive electrical boxes and installation time and cost is minimised.
