

CP-PCP & CP-SCP PATIENT CALL PENDANTS

The CP-PCP and CP-SCP pendants are attractive palm sized, easy to grip pendants with soft touch, back-lit silicone buttons for patients or residents to activate calls on Austco nurse/staff call systems and in the case of the CP-PCP, to switch their bed/reading lamp and main room light.

Both versions have a sheet gripping, DIP sterilisable water proof casing manufactured from silicone rubber with anti-bacterium additive as an infection control measure. A large non-interfering smooth moulded plastic linen clip is also included.

The call button is available as standard in green (AS 3811 compliant) or orange with soft backlighting that lights brighter when activated to provide reassurance that the call has been placed.

A yellow dual switch light control button is provided on the CP-PCP for a patient to independently switch the bed/reading light and the room light (when integrated with an RLY-2 Reading Lamp Relay or RLY-5 Dual Lamp Relay).

The pendants come with two meter of cord and a strong plastic moulded 6.35 mm jack for use with Austco's standard range of pendant callpoints.

CP-PCP & CP-SCP PATIENT CALL PENDANTS

Features	Benefits
Choice of call button colours with Braille dots on the button.	Easy user understanding and acceptance, including sight impaired users. (AS 3811 Compliant).
Large back lit buttons on easy to grip smooth pendant.	Easy to see and to activate calls, including by the infirm and those with manipulative disabilities without need for air bulb activators.
Reassurance indication.	Provides both visual and audible reassurance that a call has been placed.
Linen clip.	Clips pendant to sheet or pillow so that patients can easily find the pendant when needed.
DIP sterilisable.	Hygienic, simple to clean plastic surface.
Standard right angle 6.5mm phone plug.	Can be used with all nurse/staff call systems. And the plug is not damaged by cable tension at an angle.
Pendant removal alarm.	Automatic monitoring that pendant is plugged in.
