

CP-SMH STERILISABLE MULTI-FUNCTION HANDSET

The CP-SMH is an attractive palm sized, easy to grip soft silicone handset with soft touch, back-lit buttons for patient control of TV/music, lights, and nurse call functions on an Austco nurse/staff call system.

Comprises of a solid blue DIP sterilisable water-resistant case for easy cleaning after patient use. An earphone socket for external headphone that provides non-intrusive TV or radio/music sound is incorporated separately in the cord of the handset.

The nurse call functions feature a back-lit CALL button available in green or orange that has increased intensity back lighting to provide reassurance when a call is placed.

A yellow dual switch light control button is provided for separate switching of a bed/reading light and the room light (when integrated with an RLY-5 Dual Lamp Relay).

TV/music control buttons are On/Off, Volume up/down and Channel up/down (all grey).

The buttons are all an integral part of the handset casing manufactured from silicone rubber with anti-bacterium additive as an infection control measure.

The CP-SMH is supplied with a cord-saver section to protect the cord against cable damage should it be placed under severe tension.

CP-SMH STERILISABLE
MULTI-FUNCTION HANDSET

Features	Benefits
Unique shaped ergonomic design with textured, coloured and back-lit buttons.	Fits comfortably into a patient's hand with easy thumb or finger access to the control buttons. Avoids confusion and assists the sight impaired especially at night or in low light situations. Suitable for left or right handed use.
Single "all-in-one" patient handset.	Simple single point of control by patient of TV/music, lights and nurse call functions.
Soft touch silicone buttons with anti-bacterium additive.	Easy to activate the controls, including by the infirm or patients with manipulative disabilities.
DIP sterilisable.	Easy to clean.
Incorporates socket for external earphone.	Non-intrusive TV/music sound via earphones.
Strong cord with strain relief and cord-saver.	Secure cable connection with break-apart cord-saver to protect against cable damage should it be placed under severe tension.
Handset removal alarm.	Sounds a buzzer and activates a call if handset is removed from its socket.
Choice of TV controls.	Easy to install TV control via Infrared (no wiring into the TV) or relay control modules.
