

CPS-1DUTY & CPS-2DUTY STAFF DUTY STATION

The CPS-DUTY is a system display and callpoint station intended to allow staff the ability to make intercom calls and to view calls made by patients and staff for assistance. It is a surface mountable station sharing the same styling as the CPS-1PST patient station.

Two types are available:

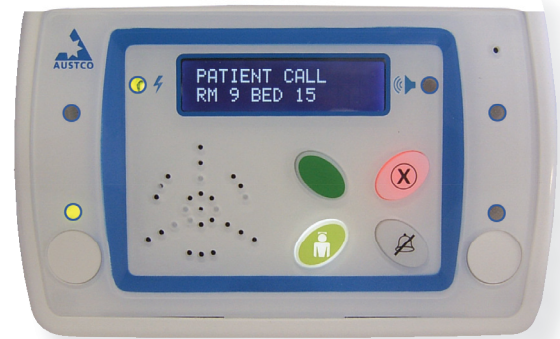

- CPS-1DUTY - for 1 series systems
- CPS-2DUTY - for 2 series systems

Call activation is by momentarily pressing either of two call buttons (labelled with their functions).

The call buttons feature soft touch operation and the button caps are manufactured from silicone rubber with anti-bacterium additive as an infection control measure. Backlighting of the silicone call buttons provides for easy location and operation at night. Audible reassurance by means of a buzzer on the callpoint is standard.

Cancelling the call is done by pressing the illuminated Cancel button.

NEW PRODUCT

CPS-1DUTY & CPS-2DUTY STAFF DUTY STATION

Features	Benefits
A two line (16 character per line) backlit LCD display.	Clear concise information of call location and priority.
