

### CPS-IML INTERCOM MODULE

The CPS-IML Intercom Module is a flush wall or bed-head mountable intercom unit for integration with Austco's CPS-1xx callpoints to provide a combined call/two-way speech point for use in audio installations of Austco's nurse/staff call systems.

The unit comprises of a microphone, speaker and control circuitry to provide clear undistorted sound for two-way speech communication between patients in their room and nurses at the nurse/staff station of the call system, as well as provides for public address announcements by nurses from the nurse/staff station.

An orange/green dual colour LED is incorporated on the front panel of the intercom to indicate the status of two-way speech connection.

CPS-IML INTERCOM MODULE

Features	Benefits
Contains no buttons or controls.	Totally hands-free operation requiring no actions by patients.
New modern unobtrusive design.	Aesthetically pleasing with concealed fixings manufactured of unbreakable plastic and matching the Austco callpoint style.
Indicator LED showing green for talk and orange for listen.	Clear indication to patients of operational status.
Separate balanced line microphone output with automatic gain control and speaker input with adjustable volume preset.	Crystal clear and undistorted audio to and from anywhere in the room and speaker volume can be adjusted to suit a room's requirements.
Public Address capability.	Saves cost of a completely separate PA system.
Fits into standard size wall box.	Uses standard electrical boxes and surrounds to meet Australian, North American or British standards.
