

TOUCH SCREEN NURSE STATION

The TACERA Nurse Station is a sleek touch screen, with optional speech handset, that provides a clear display of calls, touch-to-select features like rostering, swing ward, and call assignment for staff pagers, VoIP, fixed or wireless telephones and Vocera badges. Full ward statistics and reporting add an extra level of functionality for administrators and nurse managers.

Medical-grade touch screen

Advanced automated messaging service

Full ward statistics and reporting

Multiple Nurse Stations can connect anywhere on the LAN

CLEAR AUDIO / VISUAL DISPLAY OF VITAL INFORMATION

The Touch Screen Nurse Station is a desk mounted console with a Call Identification interface that displays actionable information and links patients with the correct health care personnel, in real-time, using wireless communication devices.

The Nurse Station provides audio / visual annunciation and display of alarms / calls received from any bed station or other callpoint on a TACERA Nurse Call System.

The level of priority, location, type and duration of each call is displayed on a real-time map or as text, and is accompanied by distinctive alert tones for each priority of call. Call indicator lights alert staff to an active call.

The optional speech handset provides full duplex, VoIP two-way speech communication. This allows calls between the touch screen and any speech point on the system to be easily initiated or answered.

The Nurse Station connects directly to the LAN for networking with Austco's IP Connect Server, the heart of a TACERA Nurse Call System.

TOUCH-TO-SELECT FUNCTIONALITY

To provide enormous functionality for your facility, the integrated touch screen, combined with a speech handset (supplied separately), enables nurses / staff to:

- Answer calls;
- Call patients;
- Make public announcements;
- Alter patient / bed to nurse / staff pager / telephone assignments;
- Edit text or text-to-voice messages;
- Send a text or text-to-voice message to other designated staff; and
- Locate other staff when operating in Staff Presence mode.

- A high-resolution back-lit monitor with a bright, high contrast display that is easy to read and simple to configure.
- Call type priorities are colour-coded, allowing highest priority calls to be easily identified.
- The automated messaging module is simple to use and ensures timely responses.

- Touch-to-select feature that allows users to easily navigate through the software.
- Class B certification ensures that the touch screen meets the new emission requirements for hospitals and aged care facilities.
