

SHROUDED CALLPOINT

PRODUCT VARIANT

An optional shroud fitting for SteriButton Callpoints that protects against accidental activation of the callpoint.

*Compatible with any button callpoint
Factory fitted*

PROTECTION AGAINST ACCIDENTAL ACTIVATION

Incorporates a 2 mm button recess and a 3 mm surround to give a total of 5 mm protection for the button.

Usually used in corridors or high traffic areas where accidental brushing of the callpoint is common.

It can also be used on high-priority call callpoints, such as Code Blue or Emergency, when call guarding is not implemented.

- Aimed at Code Blue / Emergency callpoints, the shroud is compatible with any button callpoint.
