

# ERGO<sup>PLUS</sup> MULTIFUNCTION HANDSET

An ergonomically designed, easy-to-grip handset for patient control of TV / music, lights and nurse call functions on a TACERA Nurse Call System. The solid blue, water resistant case is non-slip and dip sterilisable, and the soft touch buttons are recessed to avoid accidental activation. The entire handset is manufactured from silicone rubber with an anti-bacterial additive for improved infection control.

*Large back-lit buttons*

*Reassurance indication*

*All-in-one design that is easy to grip*

*Non-slip case and linen clip to ensure it is always at hand for your patient*

*Improved infection control*

## EASY TO IDENTIFY AND USE

A simple, all-in-one patient handset that provides your patient with a single point of control for TV / music, lights and nurse call functions.

The unique shape and ergonomic design fits comfortably in your patient's hand. Textured, coloured, back-lit buttons avoid confusion and assist sight impaired patients, especially at night and in low light conditions.

The buttons are easy to activate and are suitable for use by the infirm or patients with manipulative disabilities.

## LONG LASTING DESIGN

Manufactured from silicone rubber, the solid blue case has an all-in-one design that is robust and durable.

The Ergo<sup>PLUS</sup> Multifunction Handset is supplied with a cord-saver section that protects the callpoint socket, handset plug and cable from damage should the cable be placed under severe tension, such as moving the bed with the handset still connected.

## AUDIO CONNECTIVITY

The cable incorporates a 3.5 mm socket for external earphones, allowing patients to use their own headsets, or disposable headsets provided by the facility, without disturbing other patients in the room.

The TV controls work with any commercial television via Infrared, without the need for wiring into the television. Room and bed lights can be controlled via an IP Dual Relay.

## IMPROVED INFECTION CONTROL

The handset has an IP67 rating, allowing it to be dip sterilised for easy cleaning after patient use. The soft touch silicone case and buttons have an anti-bacterial additive for improved infection control.

- A handset removal alarm ensures instant notification that a handset is not available for your patient, reducing downtime.
- Suitable for use by left- and right-handed patients.
- The nurse call and light control buttons are large, backlit for ease of use at night, and with Braille dots on the CALL button for easy identification by the visually impaired.
- The non-slip case and large linen clip on the cable ensure that the handset does not slip off the bed and is always at hand for your patient.
- Class B certification ensures the handset meets the new emission requirements for hospitals and aged care facilities.
