

# TV CONTROLLER

The TV Controller is an Infrared transmitter for use with a TACERA Nurse Call System that provides patients with in-bed control of the television in their room.

*Versatile Infrared television interface*

*Reliable solid-state design*

*Easy to install with silent operation*

## EASY TO USE

The TV Controller provides remote operation of the TV on / off, Channel up / down and Volume up / down from the buttons on the patient's bedside multifunction handset.

## AUDIO WITHOUT DISTURBING OTHER PATIENTS

Audio is connected via the audio output jack on the television and an audio input jack on the controller. This allows patient to listen to television audio through the speaker in the entertainment handset, or through an earpiece connected to either a multifunction or entertainment handset, without disturbing other patients in adjacent beds or rooms.

## SAFE AND RELIABLE

The controller has been designed and manufactured to meet the stringent electrical isolation requirements of Australian and international Standards.

The design of the controller maintains the television's integrity and warranty, as it requires no wiring into the television.

- The TV Controller requires no wiring into the television; it is installed next to the television and uses the television's Infrared receiver for remote operation. It is programmed on-site to operate with the specific televisions on-site.
- Class B certification ensures that the controller meets the new emission requirements for hospitals and aged care facilities.
